

Overview

The purpose of the this project is to collect tools for testing and validating WSRP implementations. The first major deliverable in the WSRPtk is the [WSRP V1 Conformance Test Kit](#). The WSRP Conformance Test Kit is a set of tools that enables [WSRP \(Web Services for Remote Portlets\)](#) implementors to verify conformance of their implementations with the V1 WSRP Specification.

The [WSRPtk project](#) is an Open Source project hosted by SourceForge.net. It uses the Common Public License.

Information about contributing to the project can be found [here](#).
